

Los Angeles, Houston and New Orleans, among many others. These entities account for a sizable chunk of both U.S. gross domestic product and carbon emissions. They may not be able to get the United States all the way to our 2025 Paris emissions target, but they have the potential to go far.

Private companies, too, have been instrumental in driving the clean-energy revolution, pursuing the massive economic opportunities presented by the need to decarbonize our energy system. And consumers are increasingly demanding that companies not only provide desirable products or services, but also stand as good corporate citizens.

Finally, for citizens, it is time to hold our leaders accountable at all levels of government. Protecting our nation, our children and our American heritage should not be optional for an elected leader. Nor should preserving America's singular standing in the world.

Thursday was not a good day for climate change, and it was not a good day for the United States. Nothing we say now can change that. But it is a day that needs to be remembered as the visible moment the rear-guard opposition went too far. It is a day to spark action and resolve. It is a day that needs to count.

RUSSIA SANCTIONS LEGISLATION

Mr. VAN HOLLEN. Mr. President, the United States must send an unequivocal message to Vladimir Putin: we will not tolerate attacks on democracy in the United States or in Europe. That is why I have long pressed for harsher sanctions on Russia, including with Secretary of State Tillerson in his June 13 appearance before the Senate Appropriations Subcommittee on State and Foreign Operations. I am a strong supporter of amendment No. 232 to S. 722 on Russia sanctions. While I missed the vote on June 14 due to an unanticipated illness, I would have voted yes had I been present. I voted yes on the passage of S. 722 today.

The Kremlin's ambitions are clear. It interferes in elections in the United States and Europe, in an attempt to undermine public faith in the democratic process. It wants to erode the cohesion and strength of our NATO alliance. It bolsters the hand of brutal dictators like Bashar al-Assad. It wages wars in Ukraine and Georgia, supporting insurrections against the government. It seeks to reestablish a leading role on the world's stage through an unraveling of the international order.

Russia's use of subversion, disinformation, and irregular warfare are nothing new. However, in this last U.S. presidential cycle, Russia launched an unprecedented and multifaceted campaign to undermine our elections—a view corroborated by our entire intelligence community. Russia paid more than 1,000 people—human trolls—to work out of a facility in St. Petersburg. These trolls spent their waking hours creating anti-Clinton fake news reports and disseminating these stories in key States and districts. Russia also used thousands of botnets to echo and amplify these fake news stories. Russia also targeted the

election boards of 39 States in our country, successfully infiltrating at least four voter registration databases and gaining access to hundreds of thousands of voter records. They even attempted to infiltrate the Maryland State Elections Board, but were not successful.

In response to these attacks, I filed an amendment to S. 722 that would ensure the United States develops a strategic, long-term approach to combat Russia's cyber warfare. My amendment requires a unified strategy developed with our NATO allies and European partners to counter Russia's cyber attacks, including Russia's efforts to undermine our democratic elections. It would also require the FBI to establish a high-level cybersecurity liaison for Presidential campaigns and major national campaign committees, so that the United States is prepared for Russia's next attempt to interfere with our elections. The liaison would share cyber threats as they arise and cyber security protocols with these organizations to stave off cyber attacks. Given the critical importance of shoring up our own cyber defenses, I plan to introduce this amendment as standalone legislation at a later point.

I also filed a second amendment to S. 722 that prohibits the President from returning diplomatic compounds in Maryland and New York that the United States seized last December, in response to Russian interference in our elections. It is outrageous that President Trump is considering allowing the Russians access to these facilities, which they used to spy on the United States. I am proud to have worked with Senator CARDIN to incorporate this provision into the larger Russia sanctions bill. Senator CARDIN and I will keep working to hold Russia and the Trump administration accountable.

This legislation demonstrates to our allies and partners around the world that the United States will not stand idly when our democracy is under attack. I commend my colleagues for working across the aisle to impose tougher sanctions on Russia. Today the Senate put patriotism over partisanship.

PRIDE ACT

Mr. BOOKER. Mr. President, I rise today to speak about the Police Reporting of Information Data and Evidence Act, or PRIDE Act—legislation I introduced on Thursday, May 25, 2017. This bill would increase accountability and transparency for law enforcement by requiring States to report to the Department of Justice use of force incidents that occur between police officers and civilians. I am proud to have introduced this important bill and I want to thank Senator CHRIS VAN HOLLEN for joining the legislation as an original cosponsor. I also want to thank Representative JOAQUIN CASTRO for introducing a House companion of the PRIDE Act.

Across our Nation, law enforcement officers put their lives on the line each day to protect our communities. These individuals have answered the call to serve, and we owe these brave men and women our deepest respect and gratitude. As mayor of Newark, NJ, I saw firsthand the dangers police officers face each and every day. They must make tough, split-second decisions that have life and death consequences. They truly have one of the toughest jobs in America.

We must provide law enforcement with the tools and resources they need to do their jobs safely and effectively. That is why I have been a strong advocate for robust funding for the Byrne Justice Assistance Grant program, Bulletproof Vest Partnership program, and the Community Oriented Policing Services Hiring program. These programs support law enforcement in their mission and help make our communities safe.

While the vast majority of police officers serve with integrity and perform their duties without incident, we know that there are instances when officers engage in inappropriate uses of force. These cases are not emblematic of law enforcement as the whole; however, these incidents have eroded trust between law enforcement and the communities they are sworn to protect. This is especially the case today due to the number of incidents that are caught on video and shared on the internet. This phenomena only exacerbates the difficult job police officers have and fails to lend clarity to the actual number of cases of excessive use of force that occur nationwide.

We must work to shore up that trust deficit and ensure that those who break the law and use excessive force are held accountable and those who rightfully uphold the law are viewed in the correct light. We must collect more data on use of force incidents between law enforcement and civilians. As former Federal Bureau of Investigations Director James Comey said in an address to Georgetown University, "Without complete and accurate data, we are left with 'ideological thunderbolts.' And that helps spark unrest and distrust and does not help us get better."

For those reasons, I introduced the PRIDE Act. This legislation would require States to report to the Justice Department any incident where use of force is used against a civilian or against a law enforcement officer. It would mandate the collection of certain information such as national origin, sex, race, ethnicity, age, physical disability, mental disability, English language proficiency, housing status, and school status of each civilian against whom law enforcement used force. It would require officers to record the date, time, and location of the incident and whether the jurisdiction allows for the open-carry or concealed-carry of a firearm. It would require the officer to detail whether the

civilian was armed and the type of force used and the types of weapons used in the incident. The bill would require the officer to explain why force was used, provide a description of any injuries sustained as a result of the incident, detail how many officers and civilians were involved, and provide a brief description of the circumstances surrounding the incident.

The bill would create a grant program to help smaller law enforcement agencies—those with 100 employees or less—comply with the provisions of the bill. Also, it would allow those agencies to use the grant money to create public awareness campaigns designed to gain information regarding shootings and use of force incidents against police officers. Lastly, the legislation would allow agencies to use the funds to conduct use-of-force training, including deescalation and bias training.

There is no excuse not to collect more data on use of force incidents between law enforcement officers and civilians. Shining a spotlight on these instances will improve police-community relations, vindicate wrongly accused law enforcement officers, and provide lawmakers with the information they need to devise smart and effective policy. I am proud to have introduced the PRIDE Act, and I urge its speedy passage.

250TH ANNIVERSARY OF THE TOWN OF LEBANON, MAINE

Ms. COLLINS. Mr. President, today I wish to commemorate the 250th anniversary of the town of Lebanon, ME. Lebanon was built with a spirit of determination and resiliency that still guides the community today, and this is a time to celebrate the generations of hard-working and caring people who have made it such a wonderful place to live, work, and raise families.

The year of Lebanon's incorporation, 1767, was but one milestone in a long journey of progress. For thousands of years, the land of fields, streams, and forests of what is now southwestern Maine was the home of the Abenaki, who called the area "Towwoh," meaning "a place to grind corn." The many archeological treasures unearthed in the region include a large ancient stone mortar used by the Abenaki for that very purpose.

In 1733, the Massachusetts General Court granted Towwoh Plantation to 60 colonists, and European settlement began. When the town was incorporated on June 11, 1767, the name Lebanon was chosen in reference to the Biblical land of fertile soil and towering trees.

With the Salmon Falls River and Little River providing power, Lebanon soon was home to many lumber, grain, and textile mills. The wealth produced by the land and by hard work and determination was invested in schools and churches to create a true community.

Among the many prominent residents of the town over the years was

the Reverend Oren Burbank Cheney, who established the Lebanon Academy in 1849. His courage and vision as an outspoken opponent of slavery and advocate for full rights for women and Native Americans so impressed Boston industrialist Benjamin Bates that, when Bates College was established in Lewiston in 1864, the Reverend Cheney was named as the first president of the esteemed school.

The coming of the railroads in the late 1800s helped to make Lebanon a tourism destination, with fine hotels, inns, and restaurants. An early visitor was the famed Norwegian violinist, Ole Bornemann Bull, who performed a concert at one of the town's remarkable attractions, the enormous cavern entrance known as Gully Oven, in 1871. The virtuoso was so impressed by the acoustics of the natural amphitheater that he bought a home in Lebanon, becoming one of the town's first summer residents.

Today visitors and residents alike enjoy Lebanon's quiet parks, beautiful historic buildings, and exciting outdoor recreation opportunities. The energy and planning that are going into Lebanon's 250th anniversary celebration this July demonstrate the pride townspeople have in their town.

The celebration of Lebanon's 250th anniversary is not merely about the passing of time; it is about human accomplishment. We celebrate the people who, for longer than America has been a nation, have pulled together, cared for one another, and built a great community. Thanks to those who came before, Lebanon, ME, has a wonderful history. Thanks to those there today, it has a bright future.

TRIBUTE TO JENNIFER SANTOS

Mr. COCHRAN. Mr. President, I wish to commend Jennifer Santos for her service on the Senate Committee on Appropriations.

She has served for 5 years as a very capable budget analyst for the Subcommittee on Defense. Her accomplishments have been very impressive and a credit to the Senate.

After graduating from Wheeling Jesuit University with a degree in mathematics, Jennifer joined a defense contractor in support of the Air Force's F-22 program. She played an important role in that program and can be proud of her contribution to fielding the most capable fighter aircraft ever developed.

Her talent was soon recognized by the Air Force where she served in a series of important positions, including those involving special programs that are key to protecting our national security. Jennifer established a reputation for competence in working with leaders from Department of Defense, Congress, and other agencies to ensure the responsible allocation of taxpayer dollars.

Jennifer's detailed knowledge of military budgeting and acquisition systems allowed her to make insightful

recommendations to the subcommittee, which have resulted in the better investment of tens of billions of taxpayer dollars over her Senate tenure. In particular, her efforts have supported increased Army helicopter procurement, important research and development projects funding, and legislation to improve the management of the Department of Defense.

Jennifer Santos has upheld the highest standards of a budget analyst, congressional staffer, and defense professional. Although she is soon leaving the committee, I wish her all the best on her next steps in her distinguished career and thank her for her work in the U.S. Senate.

ADDITIONAL STATEMENTS

TRIBUTE TO LIEUTENANT COLONEL SARAH B. GOLDMAN

• Mr. ALEXANDER. Mr. President, I would like to pay tribute to my constituent LTC Sarah B. Goldman for her exemplary dedication to duty and service to the U.S. Army and to the United States of America. She has served the last year as the chief of Congressional Affairs, Office of the Army Surgeon General. Lieutenant Colonel Goldman was born and raised in Nashville, TN, and received her commission as a lieutenant junior grade in the U.S. Navy in 1998. Lieutenant Colonel Goldman transferred to the U.S. Army in 2008.

Prior to her current assignment, LTC Sarah Goldman served as a congressional liaison in the office of the Assistant Secretary of the Army, Financial Management and Comptroller, as the medical liaison for the Army Surgeon General.

Lieutenant Colonel Goldman served as the Army Traumatic Brain Injury Program director at the Office of the Surgeon General, Rehabilitation and Reintegration Division, in Falls Church, VA, from 2010–2013. In 2011, she deployed to Afghanistan as a member of the International Security Assistance Force Joint Command's special assistant for Health Affairs Health Service Support Assessment Team to review traumatic brain injury care in the Combined Joint Operations Area-Afghanistan.

Lieutenant Colonel Goldman served as the Army's service representative to multiple Department of Defense traumatic brain injury working groups and, in 2010, was appointed as a member of the NATO Technical Team "Mild traumatic brain injury in a Military Operational Setting." At the U.S. Army Research Institute of Environmental Medicine's Military Performance Division Lieutenant Colonel Goldman conducted research studies related to rehabilitation from traumatic brain injury and upper extremity neuromusculoskeletal injuries. She deployed to Balad, Iraq, from August 2009 to February 2010 as a senior scientist with the Joint Combat Casualty Research
